

## SecurSCAN S-Mobile

### WALK-THROUGH METAL DETECTOR

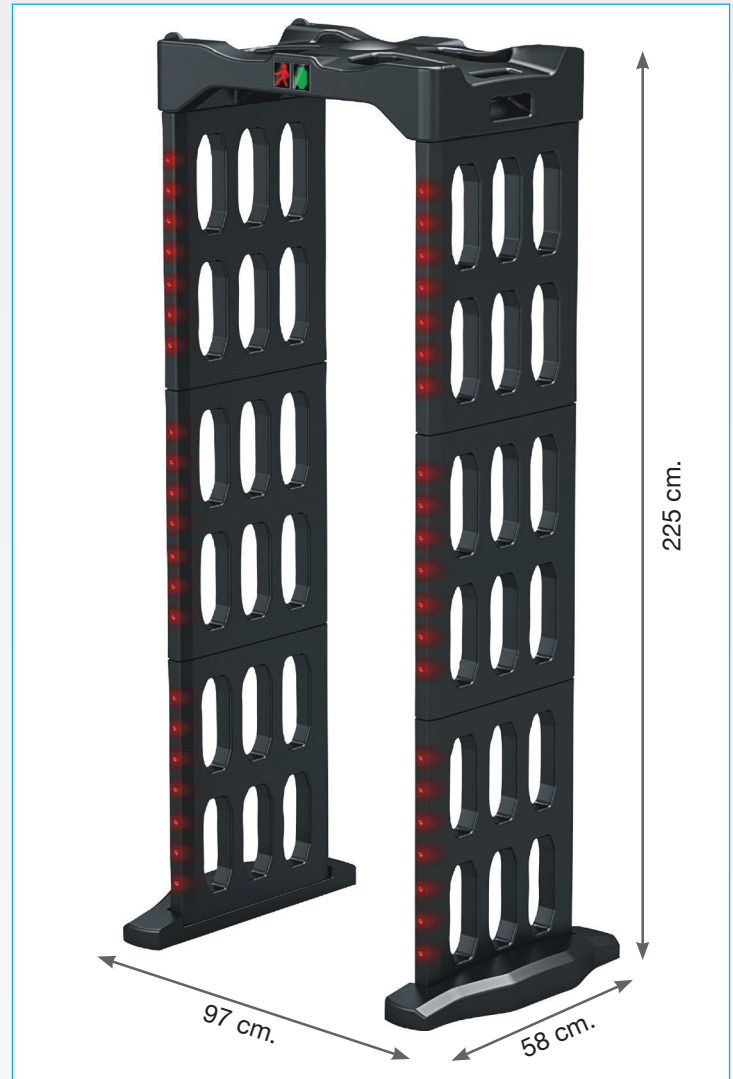

SecurSCAN S-Mobile is a **Self-powered Metal Detector Portal** whose **installation takes only a few minutes**. The **modular structure** also allows non-specialized personnel to **install it quickly and without the use of tools**, as well as to **transport it easily** thanks to the integrated trolley.

**Lightweight** but at the same time **robust** (the structure is in high-strength ABS), it is ideal for the **protection of sensitive places** with high traffic of people such as **concerts, courts, sporting events**, or other **high risk areas**, allows precise identification of dangerous objects such as **knives, guns** and other **weapons, phones** and other **electronic devices** can also be identified.

The sensitivity can be adjusted and calibrated by the operator according to the precise needs of the event.

Extremely simple to install and transport, S-Mobile is essential for security checks in:

- ✓ **Ports and embarkations**
- ✓ **Prisons and Courts**
- ✓ **Sporting Events and Concerts**
- ✓ **Competitions and exams**
- ✓ **Ministries, Embassies**
- ✓ **Government Offices**
- ✓ **Public buildings**
