

SMI 15

WHEELED MIRROR

INSPECTIONS UNDER VEHICLES

SMI 15 is a wheeled mirror designed to carry out rapid subvehicular checks in areas particularly at risk. In areas with high vehicle flow, SMI 15 allows operators to inspect quickly and effectively, even in low light conditions. Incredibly light and practical to carry, it can be assembled in no time.

PHISICAL PROPERTIES

Mirror:	in plexiglass
Mirror diameter:	30 cm.
Mirror frame:	in high-strength ABS mounted on wheels
Rod:	telescopic in aluminum
Rod length:	adjustable, from 118 to 157 cm.

MAIN FIELDS OF APPLICATION

Thanks to its versatility, SMI 15 is suitable for carrying out security checks at:

- Loading and unloading areas for goods
- Customs and border areas
- Checkpoints and security check points
- Vehicles, railway wagons, boats
- Areas of difficult access

SMI 15

WHEELED MIRROR

INSPECTIONS UNDER VEHICLES

CONTENTS OF THE PACKAGE

- 1 Wheeled mirror
- 2 Adjustable 3-section shaft
- 3 Transport bag
- 4 LED flashlight
- 5 Adjustable bracket for torch

FRAME WITH WHEELS

The ABS frame on which the mirror is mounted has 3 independent pivoting wheels that simplify its movement during the control operations.

ADJUSTABLE TORCH INCLINATION

The high-brightness LED flashlight is mounted on an adjustable bracket, meaning it allows you to choose the angle on which to direct the light beam.
